

JAVASCRIPT CONDITIONAL STATEMENTS PRACTICE

Target: Beginner Level

Focus: if / else / else if

Total Exercises: 20

PART 1: BASIC IF-ELSE (QUESTIONS 1 - 7)

Question 1: Vote Eligibility

Check if a variable age is 18 or older. Print "Eligible" or "Not Eligible".

```
let age = 20;
```

Question 2: Pass Fail

Check if a score is 50 or above. Print "Pass" if true, otherwise print "Fail".

```
let score = 45;
```

Question 3: Even Odd

Determine if a number is even or odd. Print "Even" or "Odd".

```
let num = 7;
```

Question 4: Sign Checker

Check if a number is negative. If it is less than 0, print "Negative", else print "Positive or Zero".

```
let original = -10;
```

Question 5: Password Length

Verify if a password string has 8 or more characters. Print "Secure" or "Short".

```
let password = "12345";
```

Question 6: Boolean Toggle

Check a boolean variable isLoggedIn. If true, print "Welcome Back", else print "Please Log In".

```
let isLoggedIn = false;
```

Question 7: Free Shipping

If cartTotal is greater than or equal to 50, print "Free Shipping". Else, print "Shipping Fee Applied".

```
let cartTotal = 55;
```

PART 2: MULTI-PATH ELSE IF (QUESTIONS 8 - 14)

Question 8: Traffic Light

Evaluate light color ("Red", "Yellow", "Green"). Print "Stop", "Slow", or "Go". Print "Invalid" for others.

```
let light = "Yellow";
```

Question 9: Grade Scale

Convert score to grades: 90+ is "A", 80+ is "B", 70+ is "C", below 70 is "F".

```
let marks = 82;
```

Question 10: Number Comparison

Compare a number to zero. Print "Positive", "Negative", or "Zero" precisely using else if.

```
let value = 0;
```

Question 11: Speed Limit

Check speed. speed > 80 prints "Overspeeding", speed < 40 prints "Too Slow", else print "Normal".

```
let speed = 65;
```

Question 12: Age Classification

Categorize age groups: age < 13 is "Child", age < 20 is "Teenager", else "Adult".

```
let userAge = 15;
```

Question 13: Temperature Range

Check temp. temp < 15 is "Cold", temp >= 15 and temp <= 30 is "Warm", temp > 30 is "Hot".

```
let temp = 22;
```

Question 14: Weekdays

Given day index 1 to 3. 1 prints "Monday", 2 prints "Tuesday", 3 prints "Wednesday", any other prints "Later".

```
let dayIndex = 2;
```

PART 3: LOGICAL OPERATORS & LOGICAL PROOFS (QUESTIONS 15 - 20)

Question 15: Century Leap Year

Determine if year is a leap year. Divisible by 4 and not 100, or divisible by 400. Print "Leap" or "Not Leap".

```
let year = 2024;
```

Question 16: Login Validation

Check both username and password. If username is "admin" AND password is "secret", print "Granted", else "Denied".

```
let username = "admin";  
let passwordInput = "12345";
```

Question 17: Range Inclusivity

Check if a number is between 10 and 20 (inclusive). Print "In Range" or "Out of Range".

```
let checkNum = 15;
```
